MUSEUM ARTEFACTS

Year 9 History

YOUR TASK...
You’re a Tour Guide for one night at a Museum. It is your job to explain various artefacts, diagrams and dioramas to visitors that are coming through and know nothing about the Industrial Revolution.

SUCCESS CRITERIA...
You must present your guided tour as a series of images (what the visitors would see) with an oral recording of your tour. Follow the steps below...

INVESTIGATE
Select a minimum of 5 (at least one from each list) of the following to include in your tour:

- Changes to agriculture
- Population explosion
- Steam power
- Textile production
- Coal and iron
- Trade
- Transport development

Investigate each of your chosen topics, collecting images and citing sources.

Make sure to discuss the significance of these topics to the people of the time and now, how things changed and the timeframe to change them, and the causes and effects of events.

See marking scheme to make sure you cover all aspects.

GET CREATIVE
Write a script for each item that you will record as your Tour Guide voice over, as well as an introduction.

Now put it all together. You might think about using PowerPoint, or an iPad app (be innovative).

REMEMBER
You are a Tour Guide in a Museum... your selected images should be of high quality with correct citation, and your voice over should be professional, informative and easy to understand.

BIBLIOGRAPHY
Your bibliography could be throughout your presentation (with each item) or at the end... up to you!

WORD COUNT... 4-6 minutes (please also submit your script)
Assessment...

<table>
